Subject: RE: M6H1 – Harvey Response FW: Narrative for joint press release.
Date: Monday, September 4, 2017 8:11:14 AM

Bryant, Monica, Susan,

Who do we send this narrative to for review for joint press release. It is the narrative that Jim, Jatin and I worked on yesterday which TCEQ has edited, for the purposes of telling the story behind the numbers/ maps in our daily report. We can prepare similar for WW also if needed.

“Of the approximately 4500 water systems that were initially projected to be impacted by Hurricane Harvey, approximately 2200 systems were in the affected area.

Of the systems in the affected areas, xxxx are community water systems that serve a population of xxxx, and xxxx are non-transient non-community water systems that serve hospitals, health care facilities, nursing homes, and day cares, with a population of a.

Currently the EPA and TCEQ have made contact with xxxx community water systems and have confirmed they are fully operational and servicing water to a population of xxxxx. As of xxx, there are xxx systems that have reported being on a boil water notice and xxx have reported a water outage.

Subject: Narrative for joint press release.

All,

Here is my proposed plan. I will meet with staff, Melinda Torres and EPA this morning

To get reports developed that will answer the following narrative so we are all on the same page. We have discussed EPA producing the report with Melinda Torres so that everyone will use the same report. We will get the logic together to fill in the narrative below:

“Of the approximately 4500 water systems that were initially projected to be impacted by Hurricane Harvey, approximately 2200 systems were in the affected area.

Of the systems in the affected areas, xxxx are community water systems that serve a population of xxxx, and xxxx are non-transient non-community water systems that serve hospitals, health care facilities, nursing homes, and day cares, with a population of a.

Currently the EPA and TCEQ have made contact with xxxx community water systems and have confirmed they are fully operational and servicing water to a population of xxxxx. As of xxx, there are xxx systems that have have reported being on a boil water notice and xxx have reported a water outage.

Please review the narrative and let me know what you think. I am not sure who is tasked with getting this together for the additional joint press release this morning but I think this will be a good start. It is important for EPA to include population numbers so let's leave that in. This is what can be reported and hopefully a map will be ready to post along with this info this morning right a way.

We will need this filled in as soon as possible this morning. If y'all have a different plan let me know.
